EXPLANATORY MEMORANDUM

The Local Content Bill 2021 represents the principal vehicle through which Guyana seeks to negotiate a tradeoff between investors engaged in the petroleum sector and Guyanese nationals and Guyanese companies involved in the petroleum sector. The Bill endeavours to do so by striving for economic diversification through prioritising Guyanese nationals and Guyanese companies in the procurement of goods and services for the enhancement of the petroleum sector value chain. This prioritisation will guarantee that there is an increased retention of the economic benefits in Guyana while simultaneously allowing for there to be an upsurge in the number, competencies, and capabilities of Guyanese nationals and Guyanese companies participating in the petroleum sector. To deliver on its legislative target, the Bill puts in place regulatory mechanisms to implement, investigate, supervise, co-ordinate, monitor, and evaluate participation in local content in Guyana. Altogether, the Bill provides for the promotion of competitiveness, and the encouragement of the creation of related industries that will sustain the social and economic development of Guyana as well as other related matters.
